Release 0.7.5

Alejandro Gallo

Dec 01, 2018

Contents

1	Default settings	1
1.1	dmenu gui	1
2	Indices and tables	3
	Python Module Index	5

1.1 dmenu gui

See `dmenu` and the python wrapper [here](#) for more information.

lines (*config-dmenu-gui-lines*)

- **Default:** 30

case_insensitive (*config-dmenu-gui-case_insensitive*)

- **Default:** True

bottom (*config-dmenu-gui-bottom*)

- **Default:** True

font (*config-dmenu-gui-font*)

- **Default:** monospace-14

background (*config-dmenu-gui-background*)

- **Default:** #000000

foreground (*config-dmenu-gui-foreground*)

- **Default:** #55ff55

background_selected (*config-dmenu-gui-background_selected*)

- **Default:** #005500

foreground_selected (*config-dmenu-gui-foreground_selected*)

- **Default:** #f0f0f0

header-format (*config-dmenu-gui-header-format*)

- **Default:** {doc[year]:<4.4}| {doc[title]:<80.80}|| {doc[author]}

This is not set per default, and it will default to the general header-format if not set.

editor (*config-dmenu-gui-editor*)

- **Default:** gedit

Editor used for editing info files, you should probably use a non-terminal based editor, i.e., gvim, gedit etc..

CHAPTER 2

Indices and tables

- `genindex`
- `modindex`
- `search`
